Descriptions of characters, setting and details:

Dawn: A playful human with cat ears and a cat tail. Dawn is a clockwork scientist and creates many steampunk gadgets. She likes to mess with people and act silly, but she is extremely smart. Dawn has flame claws. Dawn and Leif are longtime friends and regularly take on missions together. Dawn owns a research center in the steampunk city of Arcadia. (Dawn is shown in art further down the page)

Leif: A human adventurer who braves the dangerous wilderness of Expanse. Leif has the ability to tell if someone is lying or not. Leif is quiet and reserved, and very experienced. Leif wields a tall metal hammer. (Leif is shown in art further down the page)

The name of the story Dawn and Leif are in is Angel Expanse.

Planet Expanse: A dangerous fantasy world. Around 3 billion humans live there, mostly in the Continent of Andromeda. The technology is primitive overall, but there are rare steampunk machines in certain locations, like the city of Arcadia. Long-distance communication is very difficult. It is common that humans can use elemental magic with years of training. However, human magic is usually not that powerful. Earth creatures exist here, as well as mythical creatures. Many monsters exist, some weak, some not.

(More details about the world are further down this page)

Terror Class Monsters: Monsters that humans should flee from on sight. Usually, only Angels dare fight such a foe.

Rainbow Keys: You can enter the legendary city of Valhalla by bringing all 7 Rainbow Keys to a gateway. The Rainbow Keys are indestructible. They usually give the holder mental power or knowledge. The Blue Key gives you strategies. The

Green Key gives plant and nature knowledge. The Orange Key gives fire and heat knowledge. The Violet Key gives Ice and Sealing magic knowledge.

Waters of Life: Fountain of Youth water. Drinking can make you younger. Invented by Angel Evelynn's trinity. The effects last for a long time with no drawbacks; Nearly everyone on Expanse occasionally drinks from Fountains of Youth. The main fountain of youth is the mountain Neo Olympus Mons.

Question: Why is some of the art on this page... bad?

Author: Because I drew it, haha. I want to respect the work of the official artist, and I understand she may not want her artwork being spread this way.

Dawn

Leif

(Dawn is 5’ 0” from the top of her hair. She has a human face.)

Planet Expanse: Extended Description

Most of the human population on the Continent of Andromeda is in the north/northwest areas. There is a very large city north of the Delta of Family.

Most places outside of the Continent of Andromeda are considered deathlands, where Terror Class Monsters ravage the world. To the east, there is the deadly Continent of Pandora.

Other continents do exist. A tiny isthmus runs west from the Continent of Andromeda, leading to the so-called “Continent of Hestia”. However, that continent doesn’t have an assigned protector, and is largely dangerous.

Mayor Ethos is the female mayor of Arcadia.

Names of locations that exist on the Continent of Andromeda: City of Arcadia (a steampunk city), Valhalla Gateway (on a grassy clifftop), Grand Archive Library (skyscraper castle library), Pillars of Creation (desert pillar formation), The Garden (Lethal forest with many plant monsters. Few who enter leave.), Neo Olympus Mons, Forest of Angels (No known Angels live here, but it’s a mostly peaceful place), Delta of Family.
